Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-20 are presented for examination.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-8 and 10-15, and 18 detail "A framework" comprising: "a first tier defining" and a second tier providing specific implementations" the elements in the body of the claims apparently to refer to a data structure per se with some elements referring to a description of computer program elements per se as there is no claim element relating to computer readable media. See MPEP 2106 IV B 1 (a). It is noted that the phrase "for creating a search system..." is simple an intended use as it is not a positive statement of function as no element in the body of the claims provides a search or query.

Claims 9, 16 and 17 detail "a search system..." the body or the claims the elements in the body of the claims apparently to refer to a data structure per se with some elements referring to a description of computer program elements per se as there is no claim element relating to computer readable media. See MPEP 2106 IV B 1 (a). It is noted that the phrase "A search

system...” is simple an intended use as no element in the body of the claims provides a search or query.

Claims 19 and 20 are method claims, however, are considered mental steps or manipulation of abstract ideas, as there is no limitation in the claims to physical elements such as a computer or network of computers. See MPEP 2106 IV B 1.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Motoyama et al. US Patent No. 6,578,090.

5. As to claims 1, 2, 9, 10, 11, 18, Motoyama disclosed the invention substantially as claimed including a data processing system [“DP”] comprising “a first tier” (col. 1, lines 53-67 and col. 2 lines 1-5) and “a second tier” (col. 1, lines 53-67 and col. 2 lines 1-5).

6. Motoyama does not detail sources /resources or NetResource however as these elements are presented no function is given in the claims, as they are data elements without a claimed function they are considered non-functional descriptive material. Non-functional descriptive material cannot render non-obvious and invention that would have otherwise been obvious. See MPEP 2106 VI.

Art Unit: 2177

7. As to claims 3-8 and 12-17, the elements of these claims are also considered to be non-functional descriptive material as there is no physical system recited in and elements of the claim on which the elements may function.

8. Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sondur et al. US patent No. 6,243,746.

9. As to claims 19 and 20, disclosed the invention substantially as claimed including a data processing system ["DP"] comprising "initiating a call" it is implicit to Sondur that a call or command would be issued to access the system a access to the objects as the database support is envisioned as an independent component (col. 2, lines 10-26) and "common API..." (col. 2, lines 10-60).

10. Sondur does not detail "container NetResource" however as this element is presented with no function given in the claims, as they are data elements without a claimed function, it is considered non-functional descriptive material. Non-functional descriptive material cannot render non-obvious and invention that would have otherwise been obvious. See MPEP 2106 VI.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

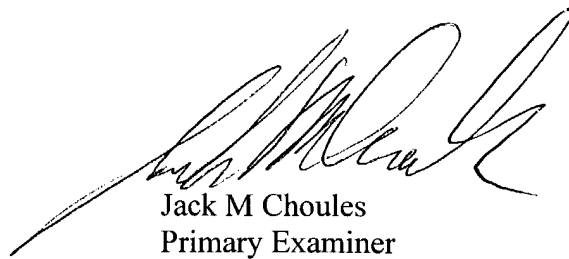

Dahan et al.	6,199,059 B1	Hierarchy of virtual objects.
Alimpich et al.	6,111,579 A	Hierarchy of network elements.
Nageswaran	6,088,651 A	Network resource search.
